## Supply and Distribution Chain in Gazelle Development Holding

The activity of this group first started with the establishment of Makan Nature Industrial Group and now in the fourth year of its establishment, with the new brand, Gazelle Development Holding, it plays an important role in the supply and distribution of raw materials for the livestock and poultry industries, dairy industries, food and meat products.

In this short period of time, this group expanded and developed its activities in various fields, including the production, supply and distribution of livestock and poultry feed inputs, sanitary materials and detergents used in livestock farms, poultry and dairy industries, ultra-modern poultry slaughterhouse, contract production of agricultural products, especially chicken meat production and production as well as import and packaging, distribution of light and heavy livestock products (red meat, sheep and veal) has been able to take a big step in creating a chain of production to consumption and eliminating unnecessary intermediaries. Of course, this is the beginning of a long road, but full of beautiful prospects for the future of the country; the ultimate hope of all the producers and servants of the "Motherland".

This rapid and continuous growth along with the trading unit of the group and taking the advantage of the capacities of countries well-known in this field promises that in the near future, it will take the first place in the supply of corn and rice in the country and through the development of trade and production in the field of basic goods, it will be known as one of the largest economic groups in the country and has aspired to be transparent in the activity, be legal, fair and effective.

Gazzelle Development Holding has been able to experience rapid and constant growth in light of good quality of products, appropriate services, honesty and strong support, and on the other hand, the grace and trust of our precious customers and the grace of God, so that in a short period of time, it has turned into of the main players of the grain market and has been able to offer diverse and high-quality products such as corn and barley to the market.

Another main area of activity of this trade group is the trade, production, packaging, sale and distribution of livestock and poultry and aquatic feed, fat powder, all kinds of medicines, detergents, food supplements for livestock and poultry, animal protein materials, distribution of products and vitamins for livestock and poultry are realized in this company.

Another mission of Gazzelle Development Holding is to respond to the demand for agricultural products in order to fulfill this lofty goal and create a direct relationship between production and support for farmers and producers and eliminate brokers in our beloved country.

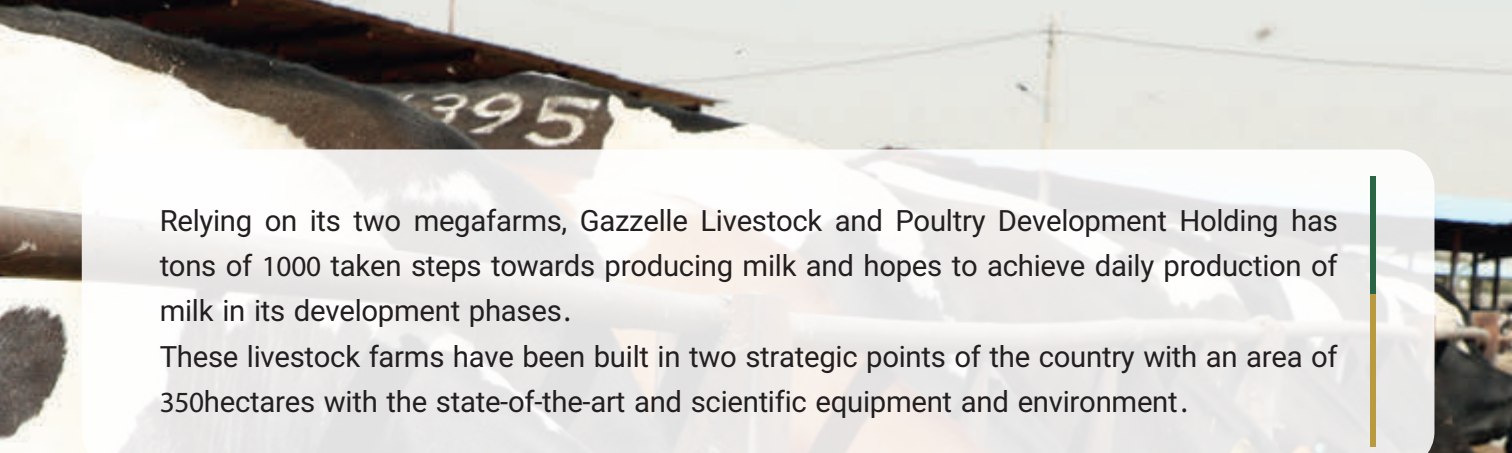

Moreover, providing raw materials for the group companies and other companies, reducing the end price of all agricultural products for purchase, considering the promotion of contract farming, the feasibility of expanding the cultivated area of products in different provinces, the maximum use of the potential capacity for investment in this area and trading agriculture product is another goal of this holding .

Since milk is one of the most important foodstuffs used by humans, and with a large amount of protein, vitamin calcium and other minerals, as well as hundreds of kilocalories of energy per liter, it can have a major contribution to the health and food basket of the society. On the other hand, the need for entrepreneurship in less privileged areas is the goal of this economic enterprise and is considered as the main pillar of entering this vital field of production .

Relying on its two megafarms, Gazzelle Livestock and Poultry Development Holding has tons of 1000 taken steps towards producing milk and hopes to achieve daily production of milk in its development phases.

These livestock farms have been built in two strategic points of the country with an area of 350hectares with the state-of-the-art and scientific equipment and environment.

Taking advantage of precise scientific and management methods along with the state-of-the-art technologies, Gazzelle Development Holding has been launched in pursuit of creating and completing a distinctive value chain in the poultry industry, focusing on improving the quality, reducing the final price of the product taking into account market fluctuations, the maximum use of the potential capacity in order to invest in the production sector of the poultry chain, trade, supply of the goods needed by the group companies and entrepreneurship, by setting up a slaughterhouse with a capacity of pieces of chicken per hour and a cold 6000 tons below zero and above 5000 storage of zero in Delijan .

Furthermore, it plans to manage the entire cycle of chicken meat production, including chicken farms, mother broiler factory, chicken breeding farms, animal feed factory, industrial slaughterhouse, meat chunking, processing, packaging, and finally distribution of the final product in domestic and foreign markets in the not too distant future.
